

Ryan Gibbons

Software Engineer

SUMMARY

Creative, detail-oriented software engineer with an interest in full-stack web development. Track record of creating and implementing successful front end web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Software Engineer at 100devs | Remote

January 2022 — Present

- Used HTML, CSS, and JavaScript to build websites and web applications.
- Combined my experience as a mathematics teacher and software engineer to build applications related to math concepts

Recent Projects:

[Clicker Predictor](#) – A web app that allows the user to test their click speed and updates a graph and the DOM with a prediction using linear regression from their previous rounds.

[Random Quiz](#) – A web app fetches trivia questions from an API and returns them to the user. It keeps track of their score and will give an endless number of questions upon request..

Freelance Web Developer at Lake Web Services | Remote

January 2022 — Present

- Developed websites for small businesses in my local area.
- Communicated with clients about their needs and presented proposals covering those needs.

Recent Projects:

[Custom Creations](#) – A website for a small business that specializes in creating custom items. Made with HTML, LESS, and JavaScript.

Mathematics Teacher at Lake County Schools | Eustis, FL

July 2016 — Present

- **Team Leader**
 - Communicated information between administration and my team of teachers.
- Implemented a new curriculum and instruction method that took the pass rate for the 8th Grade FSA from 14% and an average score of 317 to 32% and an average score of 322.
